SUMMARY

Entry-level Full-Stack Developer (React, Node.js/Express, MongoDB/SQLite) building responsive UIs and REST APIs. Strong in JWT authentication/authorization, cookies, bcrypt password hashing, Git/GitHub, and Postman testing.

EDUCATION

- NxtWave Disruptive Technologies** — Industry Ready Certification (Full-Stack Development) **Oct 2022–Present**
- B.Tech (ECE)**, Alluri Sitharama Raju district — 6.3 CGPA **2016–2020**

SKILLS

Frontend: React, JavaScript (ES6), HTML, CSS, Bootstrap | **Backend:** Node.js, Express.js, REST APIs, Middleware, Validation, Error Handling | **Database:** MongoDB, SQL, SQLite, CRUD, Joins | **Auth/Security:** JWT, Cookies, Authentication & Authorization, bcryptjs | **Tools:** Git/GitHub, Postman, npm

EXPERIENCE (NON-IT)

Padma Industries (Ceramics) — System Operator (Non-IT) **Jun 2022–Jun 2025**

- Maintained production/system logs and shift reports; coordinated issue resolution and documented handovers/follow-ups.

PROJECTS (FULL-STACK / BACKEND)

Event Management — Full-Stack (React, Node.js, Express, MongoDB) | Deploy: Vercel, Railway

- Full-stack delivery:** Built end-to-end event creation and registration flows with a responsive React UI and Express REST APIs backed by MongoDB (CRUD).
- Security + deployment:** Implemented JWT + cookie auth, bcryptjs hashing, and secure API access (CORS/dotenv); deployed on Vercel/Railway and validated APIs in Postman.

Multi-step Form — Full-Stack (React, Styled Components, Node.js, Express, MongoDB) | Deploy: Vercel, Render

Demo: multi-step.vamsimarripudi.tech

- User experience:** Created a multi-step form in React with Styled Components, step navigation, and client-side validation/state management.
- Backend integration:** Built Node/Express APIs to store and retrieve submissions in MongoDB; configured CORS/dotenv and tested requests/responses in Postman.

Nxt Watch — Frontend (React) | Demo: nxtwatch.vamsimarripudi.tech

- Frontend build:** Developed a responsive React UI with reusable components, React Router, and state management across core pages.
- Auth + API consumption:** Integrated provided REST APIs (NxtWave) and implemented JWT login, protected routes, and session persistence.

Twitter Clone API (DB Operations) — Backend REST API (Node.js, Express, SQLite) | GitHub:

github.com/vamsimarripudi/twitter-API-s.git

- API architecture:** Built a Twitter-like REST API in Node.js/Express using modular routing, reusable middleware, and JWT authentication/authorization.
- DB operations + testing:** Implemented feed/tweets/likes/replies endpoints with SQLite joins; secured passwords with bcryptjs and tested APIs using Postman.

CERTIFICATIONS & ACHIEVEMENTS

- Certification:** Generative AI Foundation — LLM fundamentals, prompt engineering, responsible AI basics
- Achievement:** Sar Pass Trek (2025) — multi-day trek completion; teamwork, resilience, adaptability
